

I am writing in support of KBHC/1-800-SUICIDE and encourage the FCC to not simply transfer the lines at a request of another government agency. Please recognize that HHS/SAMHSA have been working at trying to suffocate 1-800-SUICIDE because they created a competing hotline.

Why does the government want private confidential caller information? Please protect the callers identity and realize that HHS/SAMHSA have not paid KBHC money that Congress appropriated for no real reason. Instead they are going to the FCC to try and get a rule changed to hostilely take the lines over anyway.

Do not let that private phone companies like Patriot and McLeod work with HHS/SAMHSA to break the rules and work against this nonprofit and the public good!

If not only for the organization itself then for the people they could and have helped in the past.
